## Quality IHM

**MARHAZ** is established by the maritime companies LITEHAUZ and CTD. The founders have an extensive track record in the maritime sector and more than ten years of experience with IHM and ship recycling issues, working for ship owners, national authorities and shipowner associations.

**MARHAZ** provides IHMs compliant with the EU ship recycling regulation and Hong Kong convention for your vessels in operation and when ready for recycling. We ensure high quality and fast execution through our:

- IT backed seamless IHM development process
- Certified surveyors
- Class approved QMS
- Use of Class of your choice for certification

### WHY CHOOSE MARHAZ

- Quality is core
- Global reach at berth, anchorage, and in dock
- A team of experienced surveyors
- One-man-one-day inspections using on-site chemical analysis methodologies
- A transparent price structure

### SELCTED REFERENCES

- Stena Line
- Norwest Ship Management
- Esvagt
- Ziton
- DFDS
- Maersk Tankers

## Quality IHM

### BACKGROUND

The regulation governing the requirements for IHMs comes from the IMO's Hong Kong convention (HKC) on ship recycling and the EU ship recycling regulation, which includes all provisions of the HKC and a few additional requirements.

The provisions pertaining to IHM under EU regulation states that all vessels over 500 GT flying under European flag or calling a European port must carry a valid IHM onboard.

The European regulation entered into force in 2013 and the more stringent IHM requirements will apply from 31st of December 2020.

### MARHAZ PROCESS

- Agree on date for inspection with client
- Review documentation and compile Visual Sampling Check Plan (VSCP)
- Inspect vessel
- Analyse samples (by approved and certified laboratory)
- Prepare technical report and IHM
